PROFILE

Computer Science graduate (2025) who builds complete, tested and documented software. I have shipped full-stack web apps (TypeScript, React/Next.js, Node.js, Laravel, PostgreSQL/MySQL), a React Native app with an AI assistant on the Claude API, and hands-on OT/ICS and IoT security labs with detection rules mapped to IEC 62443 and MITRE ATT&CK. Nine months of ISP technical support gave me strong troubleshooting and communication skills. Looking for a junior developer or junior security role.

EDUCATION

BSc in Computer Science, University of Western Macedonia, Kastoria

2019 – 2025

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, PHP, SQL, C++, HTML, CSS
- **Web & Mobile:** React, Next.js, Node.js, Express, Laravel, Inertia, React Native (Expo), REST APIs, Tailwind CSS, Zod
- **Databases:** PostgreSQL, MySQL, SQLite, Oracle basics (SQL*Loader, RMAN), query tuning with EXPLAIN, migrations
- **Security:** Network traffic analysis (Scapy), Suricata, Wazuh, Modbus/TCP, MQTT, IEC 62443, STRIDE threat modelling, MITRE ATT&CK for ICS, OWASP web vulnerabilities (PortSwigger labs)
- **Tools & Practices:** Git/GitHub, Docker & Docker Compose, GitHub Actions CI, automated testing (Jest, Pest, Vitest, pytest), Stripe, JWT auth, Claude API

SELECTED PROJECTS

Home Helper API: household sync backend [GitHub](#)

Laravel · MySQL · React · 2026

- REST API for 20 household modules with policies and validation, plus an offline-first sync endpoint (last-write-wins, cursors, soft-delete safe) used by the mobile app.
- Queued and scheduled jobs (recurring bills, budget alerts, weekly email) with Expo push notifications; React/Inertia dashboard with charts; SQL insight queries tuned with EXPLAIN ANALYZE.
- Oracle admin lab (SQL*Loader, RMAN backup/restore drills) and GitHub Actions CI running 280+ Pest and Vitest tests.

Personal Home Helper: all-in-one mobile app with AI assistant [GitHub](#)

React Native · Expo · 2026

- Eight connected modules (food, fitness, kitchen inventory, shopping, budget, chores, planner, weather) in one TypeScript app, plus a standalone Wear OS companion.
- AI assistant on the Claude API with 19 tools that read and change app data, memory, photo understanding (receipts, meals), proactive daily nudges and weekly plans; 230+ Jest tests.

OT/ICS Cybersecurity Lab [GitHub](#)

Python · Docker · 2026

- PLC-controlled water tank over Modbus/TCP with a Flask HMI, IT/DMZ/OT segmentation and a conduit firewall.
- Suricata and Wazuh detection rules for attack scenarios, mapped to IEC 62443, the Purdue model and MITRE ATT&CK for ICS.

IoT Security Monitor [GitHub](#)

Python · Scapy · 2026

- Captures and parses IoT traffic (MQTT, DNS, HTTP), builds a device inventory and behaviour baseline, and raises alerts from 9 detection rules (port scans, ARP spoofing, new devices, MQTT topic spoofing).
- SQLite/JSONL logging, Flask dashboard, Docker lab with test scenarios and 88 automated tests.

Full-Stack E-Commerce Application [GitHub](#)

Next.js · Express · 2026

- Catalog, cart, checkout and order history with bcrypt + JWT/httpOnly-cookie auth and role-based admin access.
- Stripe Checkout with server-side price validation and webhook-driven fulfilment; Dockerised PostgreSQL and a custom SQL migration runner.

WiFi Troubleshooter: guided diagnostic tool [GitHub](#)

Next.js · PostgreSQL · 2026

- Branching diagnostic tree modelled on real ISP support for 4 router models, stored as relational data, editable from an admin panel and rendered with a recursive SQL query.

Smart Factory Threat Assessment [GitHub](#)

Threat modelling · 2026

- Consulting-style STRIDE threat model of a fictional factory: 30 threats scored, IEC 62443 / NIST mapping and a prioritised remediation roadmap, generated as a 26-page PDF report.

Web Security Practice Scanner · Write-ups

TypeScript · 2026

- CLI scanner for security headers, cookies, TLS, exposed files and CORS with remediation reports; write-ups of 120+ PortSwigger Web Security Academy labs (SQLi, XSS, SSRF, JWT, GraphQL).

EXPERIENCE

Technical Support Representative, Cosmote Telecom (via Mellon)

Nov 2025 – Aug 2026

- Phone support for internet, network and service issues; diagnosed and resolved connectivity, hardware and software problems.
- Built structured problem solving, prioritisation and incident-resolution skills in a fast-paced environment.

Volunteer Judge, Robotex Competition, Patras

2024

- Evaluated robotics entries on technical skill, creativity and presentation, and gave feedback to teams.

CERTIFICATIONS

- IBM Full Stack Software Developer Assessment V2 (Coursera), 2024
- Responsive Web Design (freeCodeCamp), 2024
- Introduction to Cybersecurity and Cybersecurity Essentials (Cisco Networking Academy), 2022
- Beginning C++ Programming (Udemy), 2021
