Projects

1. Full-Stack E-Commerce Application

Personal Project | 2026

GitHub: github.com/kgiannopoulou/fullstack-ecommerce

- Architected and built a full-stack e-commerce platform using Next.js (App Router), Express/TypeScript, and PostgreSQL, implementing product catalog, cart, checkout, order history, secure authentication with bcrypt + JWT/httpOnly cookies, and role-based admin access.
- Integrated Stripe Checkout with server-side price validation and webhook-driven order fulfillment; containerized PostgreSQL with Docker Compose and developed a custom SQL migration runner for reliable database setup and deployment.

2. Wifi Troubleshooter — Full-Stack Diagnostic Tool

Personal Project | 2026

GitHub: github.com/kgiannopoulou/wifi-troubleshooter

- Built a guided WiFi troubleshooting web app (Next.js App Router, PostgreSQL) that walks users through a branching diagnostic tree of narrowing questions to a likely root cause and fix, modeled on real ISP support workflows across 4 router models (Speedport Plus, Speedport Plus 2, ZTE H1600, RDK Vantiva).
- Modeled the diagnostic tree as relational data instead of hard-coded logic — questions, answer options, and reusable fix write-ups stored in PostgreSQL and fully editable through a custom-built admin panel, including a recursive SQL query to render the tree in traversal order.

3. Personal Website

Personal Project | 2024–2026

Link: <https://kgiannopoulou.github.io/website-portfolio/>

- Developed and deployed a responsive personal website using HTML/CSS/JS.
 - Implemented SEO strategies for better visibility.
-

Experience

1. Technical Support Representative

Comsote Telecom – Mellon

November 2025– Aug 2026

- Provided technical support to customers via phone, assisting with internet, network, and service-related issues.
 - Diagnosed and resolved connectivity, hardware, and software problems efficiently.
 - Strengthened structured problem solving, communication, prioritization, and incident-resolution skills in a fast-paced technical environment.
-

Education

Bachelor of Science in Computer Science
University of Western Macedonia, Kastoria
2019-2025

Certifications

- Responsive Web Design Certification, freeCodeCamp, 2024
 - Full Stack Software Developer Assessment V2, Coursera, IBM, 2024
 - Introduction to cybersecurity, CISCO, 2022
 - Cybersecurity Essentials, CISCO, 2022
 - Beginning C++ Programming, Udemy, 2021
-

Technical Skills

- Languages: JavaScript, TypeScript, C++, HTML, CSS, SQL
 - Frontend: React, Next.js, Tailwind CSS, Responsive Web Development
 - Backend: Node.js, Express, REST APIs, JWT, Zod
 - Databases & Payments: PostgreSQL, SQL migrations, Stripe Checkout, webhooks
 - Tools: Git, GitHub, Docker, npm
 - Web: SEO, WordPress
-

Languages

- Greek (Native)
 - English (C2)
 - German (B1)
-

Volunteer Experience

Judge, Robotex Competition – Patra, Greece | 2024

- Evaluated robotic entries and provided feedback.
- Ensured fair assessments with the judging team.
